Welcome to BJ Angus Genetics 24th Spring Production Sale!

Dear Friends,

BJ Angus Genetics has produced Angus seed-stock since 1993. We are extremely proud to offer you the most elite & valuable set of cattle we've produced. This sale features 85 registered bulls, 64 registered females, & 20 commercial bred heifers all sired by some of the most trusted AI sires in the breed. Our goal is to produce problem-free bulls and females that excel in calving ease, disposition, maternal traits and carcass quality that will maximize your cowherd profits. We guarantee our cattle will work for you.

We encourage you to study the average AAA EPDs for this sale. From calving ease, weaning and yearling weight, milk and end product merit, this offering will fit in any production environment, regardless of geography. For those believing you must choose between maternal or end product merit, I call your attention to the average AAA EPDs. The "average" bull in our 2026 offering ranks in the top 1% for Marbling, 2% for \$Combined, 3% for \$Beef, 5% for Ribeye and 35% for \$Maternal; the "average" female ranks in the top 2% for Marbling, 4% for \$Beef and \$Combined, 10% for Ribeye and 30% for \$Maternal. The cattle in this sale are elite for economically important traits as "you can have it all" (calving ease, rapid early growth, tip top performance, excellent maternal, excellent structure and elite end product merit). Your greatest challenge is to "choose" which bulls and females best fit your operation and marketing goals. Sort the bulls in this sale for the traits that you need to make directional change and then inspect the bulls. Buy the ones that physically fit your preference and price.

Once again we are proud to offer you registered cattle from Sherfick Cattle Company, WaKeeney, KS, and commercial bred heifers from Brian Walt, Collyer, KS. Brian offers a tremendous calf buy-back program for calves produced from bulls purchased at BJ Angus Genetics sales. Not only are they excellent people and businessmen but they breed cattle that will make you money. Buy with confidence as they honor the BJ Angus Genetics guarantee!

Please go to our websites, www.bjangus.com, or www.sherfickcattleco.com to view updated EPDs, sortable Excel spreadsheets, videos of each animal in the sale (March 1), and an online catalog. If you are unable to join us at the sale, please consider logging on www.Live-Ag.com to bid online.

We are so THANKFUL for your TRUST in our FAMILIES and our CATTLE.

Sincerely,

John & Bonnie Slocombe

INSPECTION OF CATTLE

The cattle are available for inspection at BJ Angus Genetics after March 6, 2026. Prior to March 6, the registered females owned by BJ Angus Genetics are available for inspection anytime, Manhattan KS; all the bulls and the registered females owned by Travis Sherfick are available for inspection at Sherfick Cattle Company, Wakeeney KS; the commercial Angus bred heifers are available for viewing at Brian Walt's Ranch, Collyer, KS.

SIGHT UNSEEN PURCHASES

If you would like assistance in selecting bulls/females, please call or email John, Travis or Brian. We will assist you in determining the best possible bulls/females for your operation. You may leave bids with us if desired, we will buy the cattle as cheap as we can. Our programs are built on trust and integrity.

SUPPLEMENTAL INFORMATION

A Supplement Sheet will be available sale day with complete and updated information. This information will also be posted on our websites, www.bjangus.com and www.sherfickcattleco.com. Announcements made by the auctioneer regarding the cattle selling takes precedence over the information listed in this sale book or the Supplement Sheet.

TERMS AND CONDITIONS

Cattle will sell under the Suggested Terms & Conditions of the American Angus Association (www.angus.org/Pub/suggested_sale_terms.pdf). Purchaser assumes the risk of death or injury to their livestock immediately after the animal is sold. Cattle purchases are to be settled (via check or cash) before pickup or delivery.

LIVESTOCK MORTALITY INSURANCE

James Bessler (815) 762-2641

One has to appreciate the awesome phenotype of 4158. Moderate frame, abundant length and depth of body, excellent feet and legs, quiet disposition and all-around smoothness makes him a standout in this offering. This calving ease prospect is a son of Fireside who is the Fireball son having the greatest impact on the Angus breed. 4158 stems from one of our most proven cow families for maternal, performance and carcass traits. His dam, 1248, the best Home Town daughter we've produced, posts WWR of 1@111 and YWR of 1@108.

Birth wt.: 71 lbs. Thick topped, deep bodied and breed leading genetic predictions. Notable over +2.0 for Marbling and +1.43 for RE!

58

BJ Fireball 4201

Table with columns: Birth Date: 8/26/24, Bull, 21028898, Tattoo: 4201. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 73 lbs. Really nice Fireball son from a beautifully designed Salvation daughter. 4201 is as deep and soggy as you'll find anywhere with an EPD profile offering top tier growth, maternal and end-product merit. Nice bull.

59

BJ Transcendent 4140

Table with columns: Birth Date: 9/13/24, Bull, +21302953, Tattoo: 4140. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 67 lbs. Transcendent progeny are some of the highest marbling in the breed. 4140 is a super attractive, deep bodied and powerful individual with excellent growth, maternal and end-product EPDs. Notable +1.94 Marb.

60

BJ Jonesboro 413

Table with columns: Birth Date: 9/10/24, Bull, +21050083, Tattoo: 413. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 76 lbs. Lots of power in this big-numbered outcross pedigreed Jonesboro son.

61

BJ Transcendent 4162

Table with columns: Birth Date: 8/22/24, Bull, +21302964, Tattoo: 4162. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 74 lbs. Incredible bull for growth, marbling and muscle from a highly proven dam.

62

SC Fireproof 33M

Table with columns: Birth Date: 9/1/24, Bull, 21376306, Tattoo: 33M. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 71 lbs. 33M's pedigree is loaded with some of the most highly proven bulls in the breed. He's a big volume, moderate frame individual that offers calving ease, superior rapid early growth, excellent feet and elite end-product merit predictions.

63

SC Fireproof 81M

Table with columns: Birth Date: 10/3/24, Bull, 21390842, Tattoo: 81M. Includes pedigree information and performance metrics like CED, BW, WW, YW, SC, Milk, DOC, CW, MARB, RE.

Birth wt.: 69 lbs. Low BW, big SC, strong maternal traits, good footed and top 3% Marb EPD.

HERE'S THE **BEST** **OFFER** YOU'LL HAVE **TODAY!**

Our good friend, Brian Walt, W6 Cattle Co., Collyer, Kansas, is a diversified commercial cow-calf producer and cattle feeder. For the past few years, Brian has offered several outstanding, home-raised commercial Angus heifers in our spring production sale. As a cow-calf producer, cattle feeder and backgrounder, Brian recognizes the added value of BJ genetics throughout the supply chain, and would like to bid, buy, or partner on your commercial calves.

ELIGIBILITY:

- Steers or heifers
- Weaned to 800-850 lb calves

REQUIREMENTS FOR ELIGIBILITY:

- Advanced notification on calves to sell
- Calves must receive two vaccinations for respiratory disease (pre-weaning & branding)
- Calves must be sired by bulls purchased in BJ Genetics sale

WHAT WE DO:

- With advanced notice, we are willing to bid, buy or partner with seller.
- We are willing to share the feedlot data and carcass summary.

We will background weaned calves until they reach appropriate weights to enter the feedlot. Finished cattle will sell through USPB and be processed at a National Beef plant. We will share all the data, regardless of a seller's level of participation. Seller's choosing to partner with us on their calves will receive their pro-rated share of profits after all expenses have been deducted.

Brian Walt • (785) 769-4889

REFERENCE SIRES

THE BJ ANGUS GUARANTEE

We guarantee that all breeding cattle sold at a BJ Angus Genetics Sale, both bulls and females, are fertile to the best of our knowledge. If a bull is injured anytime during the first breeding season following the sale so as to make them functionally infertile, we will provide you a satisfactory replacement, if available, or issue you a credit equal to the bulls purchase price minus the salvage value received for that bull. If a female is determined a non-breeder, then we would ask you to sell her and would offer you the difference of her purchase price minus the salvage value as a credit in any future BJ Angus Genetics sale. This guarantee is in addition to the Sale Terms and Conditions of the American Angus Association which also apply. This guarantee is not a life insurance policy. We will not replace a dead animal if it is killed or dies for any reason. All credit is good until it is used and does not expire. We simply ask you contact us before you cull any infertile animal.

A WORD ABOUT FREE DELIVERY

BJ Angus offers its customers free delivery in the lower 48 states. As part of that delivery we work with reputable livestock transportation companies that we feel comfortable with in the handling of your cattle in both a professional and conscientious way. BJ Angus Genetics will do everything possible to deliver your cattle to a point that is convenient for both you and the trucking company. In some cases where the cattle are from multiple owners loaded on the same truck, it is necessary for the buyer to meet the truck at a central location such as a livestock auction or veterinary clinic relatively close to them. We also encourage the drivers to be as flexible as possible and request that they not deliver your cattle in the middle of the night if avoidable. Most of the cattle to be delivered from the sale are delivered within 45 days after the sale. If, for any reason, you desire an expedited delivery, please notify John Slocombe at (785) 532-9777 or email john@bjangus.com and we will make arrangements for quicker delivery. Commercial heifers will be delivered free in Kansas only.

Dr. Lee Penner, Penner Veterinary Services
Dr. Curt Vogel, Heritage Veterinary Services

GLOSSARY OF TERMS AND ABBREVIATIONS

Expected Progeny Differences (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. The EPD will be preceded by an “I” and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility EPD (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mother-

ing ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

CARCASS

Carcass Weight EPD (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

\$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index value expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

Combined Value (\$C), an index value expressed in dollars per head that includes all traits that makeup \$M and \$B.

GENEMAX ADVANTAGE BENCHMARKING

GROUP	ID	SIRE	BREEDING DATE	SERVICE SIRE	FETAL SEX	GeneMax Percentile Rank				Angus \$Values		
						WW	CW	MARB	RE	\$M	\$B	\$C
1	1493		04/24/2025			30%	40%	3%	30%	+50	+154	+254

TRAIT PERCENTILE RANK AND \$VALUE DESCRIPTIONS

Weaning Weight (WW)	Genetic merit percentile ranking for improved weaning growth
Carcass Weight (CW)	Genetic merit percentile ranking for larger carcass weights
Marbling (MARB)	Genetic merit percentile ranking for improved marbling score and higher carcass quality grades
Ribeye (RE)	Genetic merit percentile ranking for increased ribeye area
Maternal Weaned Calf Value (\$M)	Multi-trait index expressed in dollars per head that predicts profitability differences from conception to weaning.
Beef Value (\$B)	Multi-trait index expressed in dollars per carcass predicting profitability differences in postweaning performance and carcass value.
Combined Value (\$C)	A conception to carcass index expressed in dollars per head characterizing profitability differences in a complete production system retaining replacement females and marketing fed progeny on a quality-based carcass grid.

REVENUE SHARING & SEMEN INTEREST

BJ Angus Genetics or Sherfick Cattle Company retains a 1/3 semen interest in every bull sold. This means the bull is totally in your control in how you want to handle him and you get 100% of the salvage value of the bull. Simply, we are reserving the right to a share of semen sales revenue from the bull if, at some time in the future, semen sales become a possibility. If you sell the bull to another breeder, BJ Angus Genetics or Sherfick Cattle Company retains the semen interest.

It is unlikely that large amounts of semen will be sold from many bulls. However, bulls are often “discovered” later in life, after proving themselves in the breeding pasture. It is for this reason we keep a semen interest in all bulls sold.

Even bulls sold to commercial herds may become popular at a later time, as more carcass data is collected on their calves.

If you purchase a bull that we retain an interest in and you choose to collect semen from that bull as an “insurance policy” for your own use, that semen is 100% yours. BJ Angus Genetics or Sherfick Cattle Company may also wish to collect semen from the bull either for in-herd use or to build a jointly-owned semen bank for sale purposes.

If you are not interested in collecting semen on the bull, BJ Angus Genetics or Sherfick Cattle Co. has the right to collect the bull, at their own expense, for their own use. The bull would be collected at your convenience.

Driving the science of better breeding

There's little room for error in the cattle business. You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI[®]) provides it through genomically-enhanced expected progeny differences (GE-EPDs). GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association[®], home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they had recorded 9-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Heifer Pregnancy	28
Calving Ease Maternal	18	Maternal Milk	33
Birth Weight	22	Mature Weight	14
Weaning Weight	25	Mature Height	9
Yearling Weight	20	Carcass Weight	13
Yearling Height	15	Marbling Score	10
Dry Matter Intake	12	Ribeye Area	11
Scrotal Circumference	12	Backfat Thickness	11
Docility	10	Teat Size	12
Foot Claw Set	13	Udder Suspension	13
Foot Angle	12	Pulmonary Arterial Pressure	7
		Hair Shed Score	10

How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS[™] powered by partner Neogen GeneSeek or the HD50K by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.
